JOINER MICRO LABS REJECTION POLICY

For your protection, Joiner Micro Labs has a Water Sample Rejection Policy. This is to insure the collected sample is a good representation of the water quality. Please take time to familiarize yourself with our policy.

THE WATER SAMPLE MUST BE...

-  properly identified & accompanied by registration form
-  received at lab within 30 hours of collection
-  bottle filled to 125 mL line
-  absent for chlorine. (This applies to non-chlorinated water sources only. We screen all samples for chlorine.)

SAMPLING INSTRUCTIONS

Please read the following before collecting your sample.
Collect sample in the sterile container provided by Joiner Micro Labs.

1. **Do not** open the sample container until you are ready to collect your sample.
2. **Do not** use container if the seal is broken or bottle is cracked.
3. Remove the aerator screen from the faucet.
4. Saturate a cotton ball with isopropyl alcohol.
5. Swab the inside and outer portion of the faucet.
6. Run cold water 5 minutes.
7. Open the container- **do not** touch the inside of top or inside of container.
8. Carefully fill the container to the **125 mL line**.
9. Replace cap and tighten securely.
10. Write your name on the container.
11. **Keep sample cold** or refrigerated until delivered to the Lab.
